

STUCK FAST!

1. Your group needs to appoint a recorder, timekeeper and presenter.

You are a creature attached to the underwater reef rock in the waters around Bermuda. Parts of your body can move but you are firmly and permanently attached to the reef rock. Your group needs to think about ways to survive even though you are ...STUCK FAST!

2. The recorder writes the group's ideas on survival based on how you will:
 - A. Obtain food.
 - B. Protect yourself from predators (things that will eat you) and storm waves. If you get knocked off the rocks you will die.
 - C. Reproduce to continue your species.
3. Use the paper provided to draw a picture of your animal to show the features listed above. This drawing will be presented and explained to the class later.
