

**Principle 2: Grades K-2**  
November 2008

The ocean and life in the ocean  
shape the features of Earth.

A.1.  
Erosion is the wearing away of rock, soil, and  
other biotic and abiotic Earth materials. OL 2c  
NSES(K-4), CA(K2), CO (K-4), FL(K-2)

A.2.  
Many Earth materials  
originate in the ocean and are  
worn away by waves. NY(K-4)

A.3.  
Some Earth materials at  
the shore come from land  
and are carried to the coast  
by rivers. NY(K-4)

A.4.  
Rivers and waves shape  
the coastlines. NY(K-4)

A.5.  
Sand consists of tiny bits  
of animals, plants, rocks,  
and minerals.

See Principle 1
