

MyOSD 2015

Unmask the invisible heroes of the ocean!

The **Ocean Sampling Day (OSD)** is a global scientific campaign to analyse marine microbial biodiversity and function. The first OSD took place during the solstice on **June 21st 2014**.

On this day, people all around the world took water samples from the ocean in order to identify the microbes in it, and 20% of them were **citizen scientists**.

More than 100 people took part in MyOSD in June 2014

Join us this year!

How?

contact the OSD hub
in your area

obtain your
sampling kit

download the
oSD App

take water
samples

PUT YOUR STAMP
ON THE GLOBAL MAP!
